

# GREEN OFFICE

## VRIJE UNIVERSITEIT AMSTERDAM

### **Education coordinator**

The main task of the Education Coordinator is to provide structural changes towards a VU educational programme wherein sustainability is well covered. The Green Office VU aims at integrating sustainability into all the courses offered by the VU. This is being accomplished by carefully checking the current educational programme and identifying where sustainability-related modules could be added or new courses be designed. Besides that, the GO.VU wants to give students the opportunity to learn more about sustainability outside their mandatory courses. To achieve this, monthly lectures are organized where inspirational speakers, experts within a subtopic of sustainability, are invited. Your main tasks will include regular meetings with staff and lecturers of different faculties, team education (they organize the lectures), and others involved within the education programme of the VU. Apart from that, this portfolio currently offers the opportunity to start new projects, as many of the former goals have already been accomplished.

Some tasks of the offline community coordinator are:

- Identify opportunities within existing curricula to increase sustainability-related content
- actively approach lecturers and develop course-related projects together
- provide extracurricular opportunities to learn about sustainability
- widen focus to employees of the VU
- support members team in finding speakers for lectures

As the Education Coordinator you have/are:

- Interested in working together with lecturers and developing courses
- Able to work independently with a pro-active attitude
- Ideas for new projects
- Knowledge about the educational structure of the VU

If you don't comply with all these skills, that's not a problem. The Green Office is also a place to develop skills and learn
